Canada's FIRST and ONLY Certified Bed Bug Detector!

We would like to introduce you to Tracker - Canada's first and only certified Bed Bug detector. Bed Bugs are an extremely difficult infestation to detect and eradicate, and as a result, the effectiveness of most pest control methods is unknown. Human visual inspections are estimated to be only 17 to 30% accurate since bed bugs can hide under carpets, inside box springs and mattresses, in electronics, in baseboards and behind walls where true inspections are extremely difficult if not impossible. In the absence of accuracy and assurances that treatment efforts have worked, it is difficult to measure the success of efforts to eliminate these bugs from your premises.

After months of extensive research into the best option available to combat bed bugs, we pursued the most effective method available. We purchased Tracker from a canine academy certified by the National Entomology Scent Detection Canine Association (NESDCA) and two of our employees undertook the special training required to become certified handlers. Tracker has received months of intensive training and reputable studies of NESDCA-certified dogs have proven that these dogs achieve 98% accuracy in pin pointing the exact locations of LIVE BED BUGS and VIABLE EGGS.

Our Bed Bug Inspection service is vital to establishments that need to determine the exact whereabouts of bed bugs prior to undertaking a treatment program and then want a follow-up to ensure not only its efficiency, but its effectiveness. In addition we offer monthly & quarterly proactive monitoring services as well.

To book Canada's First and Only NESDCA certified dog to inspect your premises for bud bugs, call Sandy at (416) 613-0225 or email sandy@thebedbugtracker.com.
